

Assessment Brochure

Turn Assessment Data Into Student Growth

A complete assessment system designed for intervention. From powerful placement insights to progress monitoring and reporting, Do The Math® helps you make informed decisions that support student success.

Clarity at Every Step of Intervention

Successful intervention requires more than identifying learning gaps—it requires ongoing insight into student progress.

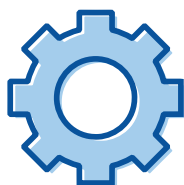

Do The Math provides a complete assessment system to help educators determine where students should begin, monitor progress throughout instruction, and measure learning over time. Connected assessments and actionable reporting make it easier to target instruction and demonstrate impact.

Together, these assessments provide a clear view of student understanding and growth.

BEFORE INSTRUCTION

Placement Assessments

ACROSS EACH MODULE

Module Assessments

DURING INSTRUCTION

Formative Assessments

Know Where to Start

Students enter intervention with different strengths, gaps, and unfinished learning. The *Do The Math* Placement Assessments help you identify the right starting point within the program, ensuring instruction aligns to each student's readiness and learning needs.

Designed specifically for intervention, these assessments pinpoint the first area where students consistently struggle. By analyzing student performance across learning progressions, you gain the insights needed to make confident placement decisions and target instruction where it will have the greatest impact.

Placement Assessments:

- Identify the right entry point for instruction
- Reveal strengths and unfinished learning
- Pinpoint the first area of consistent difficulty
- Support data-informed grouping decisions
- Eliminate guesswork and maximize instructional time

Impact: Start every student at the right instructional level from day one.

Assessment Coverage:

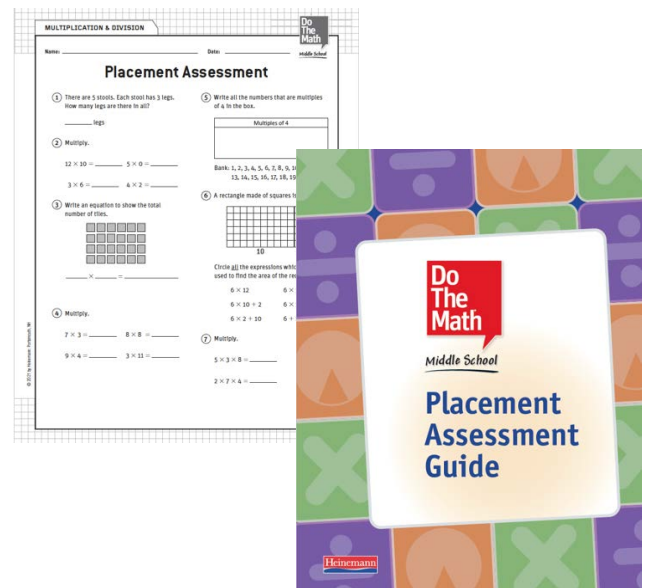

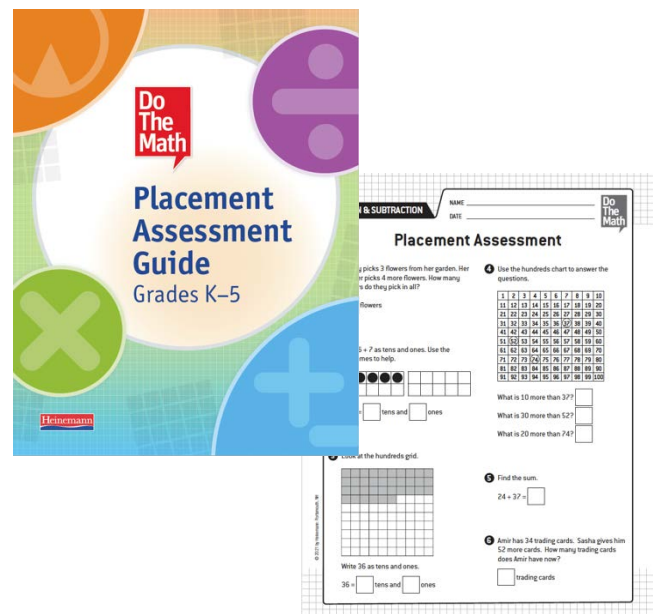

Grades K–5

- Addition & Subtraction
- Multiplication
- Division
- Fractions

Middle School

- Multiplication & Division
- Fractions

Available in digital and print.

NEW! Placement Assessments

Identify the right starting module with confidence.

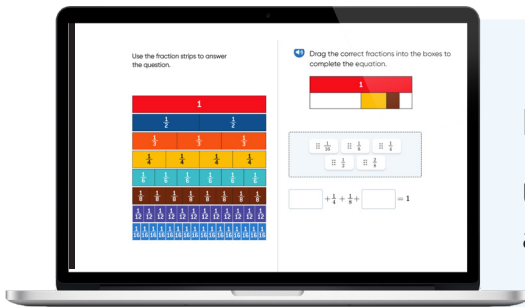

Monitor Growth Every Step of the Way

Placement is only the beginning.

Do The Math includes a connected system of assessments that provide ongoing insight into student understanding throughout each module. Module Assessments help you monitor understanding, identify misconceptions, and make informed instructional adjustments throughout the learning process.

Impact: Monitor progress and keep learning on track.

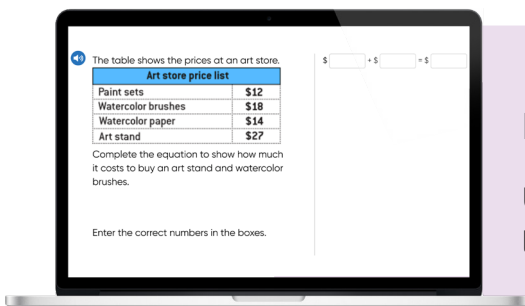

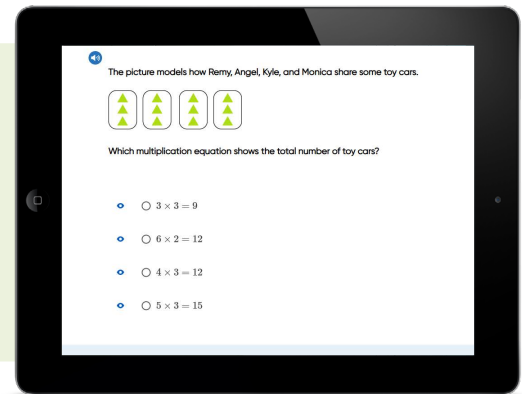

Beginning-of-Module Assessment

Use this before each module begins to see what students already know and what skills they need to build on.

Middle-of-Module Assessment

Check progress midway through instruction to see how students are doing and spot any areas where they may need a little extra support.

End-of-Module Assessment

Use this after instruction to measure what students learned and how much they grew.

Adjust Instruction in Real-Time

Respond to student needs before learning gaps grow.

"Show What You Know" formative assessments provide quick opportunities to monitor understanding during instruction and make timely instructional adjustments.

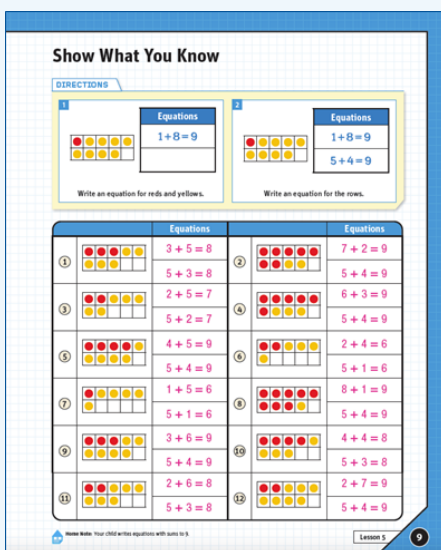

These assessments help you gather evidence of learning, identify misconceptions, and reinforce key concepts as students progress through intervention.

Benefits:

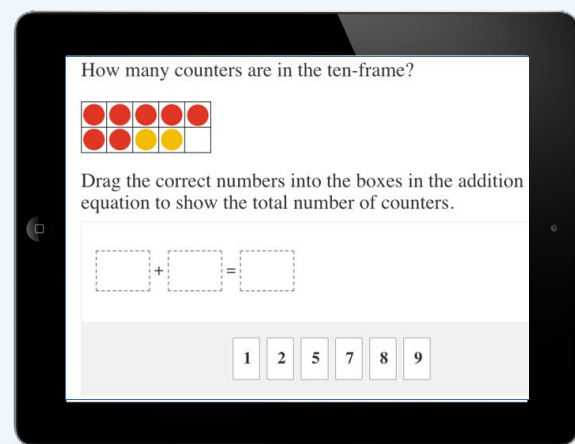

- Monitor understanding during instruction
- Identify misconceptions early
- Inform next instructional steps
- Generate actionable reports with digital assessments

Impact: Real-time insights that help you adjust instruction right away.

"Show What You Know" FORMATIVE ASSESSMENTS

Available in Print

NEW! Digital assessments now available on Heinemann Flight

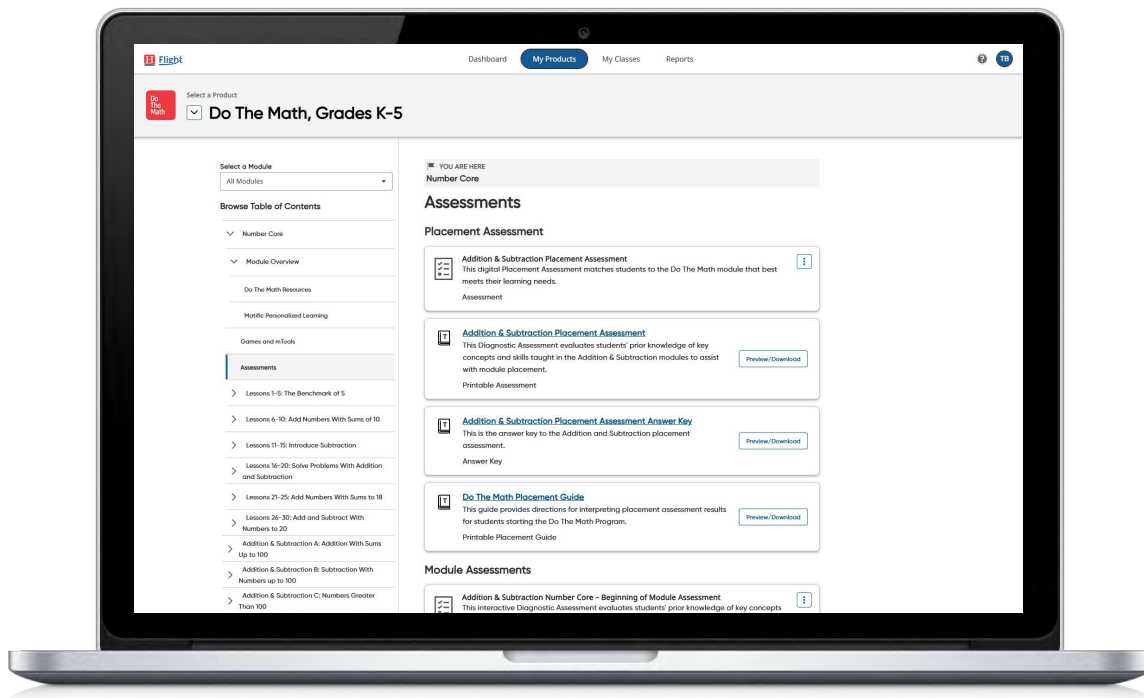

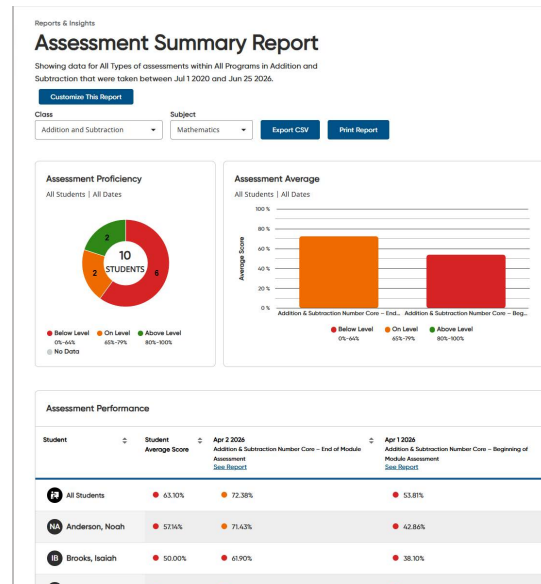

Turn Data Into Action

Knowing where students start is important—but knowing how they're progressing is what drives results. *Do The Math* reporting on Heinemann Flight brings assessment data together in one platform, making it easier to monitor progress, identify trends, and evaluate intervention effectiveness over time.

Benefits:

- Access placement, formative, and module assessment data in one place
- Monitor student growth across skills and modules
- Identify trends at the classroom, school, and district levels
- Evaluate the effectiveness of intervention efforts
- Gain clear evidence of student progress and program impact

Impact: Stronger instructional decisions and greater confidence that intervention is making a difference.

Better Assessment

Better Outcomes for Everyone

School & District Leaders

See the big picture with consistent data that helps you evaluate intervention, monitor implementation, and make informed decisions.

Teachers

Get the insights you need to place students confidently, respond to learning needs quickly, and keep instruction moving forward.

Students

Receive instruction that's targeted to their needs, builds confidence, and helps them make steady progress.

Stronger Intervention Starts Here!

Know where students are. Know what to do next.

When educators have the right insights at the right time, intervention becomes more targeted, more effective, and more impactful. Discover how *Do The Math* helps schools turn assessment data into better decisions—and better outcomes for students.
